### COURSE ABSTRACT

This course provides a basic understanding of the principles and practices of financial management in a global context. It explores the challenges and opportunities faced by companies operating on the international level.

The course starts with the main concepts of international financial management and the international monetary system. The course covers foreign exchange exposure and principles of risk management. Further essential topics refer to financing international operations and the use of international financial instruments. The course also covers emerging trends in international financial management, including FinTech, ESG etc.

The course concludes with an assignment designed to ensure students develop the skills and competencies necessary to analyse international financial issues.
